IN THE ABSTRACT:

Please replace the Abstract of the Disclosure originally filed with the above-identified patent application with the following new Abstract of the Disclosure:

ABSTRACT OF THE DISCLOSURE

A laminated coil includes a laminated body having magnetic body sections that are provided on both main surfaces of a non-magnetic body section and include a plurality of stacked magnetic layers, the non-magnetic body section including at least one non-magnetic layer, and a coil including helically connected coil conductors provided in the laminated body. The conductor width of at least one of the coil conductors provided inside the non-magnetic body sections and the coil conductors provided on both main surfaces of the non-magnetic body sections is greater than the conductor width of the other coil conductors in the laminated body.
